Education

Texas State University

Bachelor of Science in Computer Science | GPA: 3.80/4.00

San Marcos, TX

Expected Dec 2027

Technical Skills

Languages: Python, C++, Kotlin, SQL, JavaScript, C

Backend and Data: FastAPI, Django REST Framework, PostgreSQL, Supabase, Firebase, REST APIs

AI: LangGraph, LangChain, Gemini | **Tools:** Git, GitHub, Android Studio, LangSmith

Android: Jetpack Compose, MVVM, Hilt, Coroutines, StateFlow, Room, WorkManager, Ktor

Projects

Adaptive AI Learning System

Jun 2026 - Aug 2026

Python, FastAPI, LangGraph, PostgreSQL

- Designed a stateful LangGraph agent that routes learners through diagnosis, teaching, practice, and evaluation based on evolving learner state.
- Built PostgreSQL persistence for concept mastery, confidence, misconceptions, and interaction evidence across sessions.
- Exposed the agent workflow through FastAPI for a native Android client; implemented dependency-aware concept resolution, controlled tool calling, and deterministic state updates.

RawThoughts - Offline-First Book Platform

Feb 2026 - May 2026

Kotlin, Jetpack Compose, Room, WorkManager, Supabase

- Architected an offline-first application with UI, domain, and data layers using MVVM, Hilt, StateFlow, and unidirectional data flow.
- Implemented repository-based local and remote data layers with Room as the source of truth; used WorkManager for queued writes, connectivity-aware retries, and synchronization with Supabase.
- Integrated authenticated Supabase Edge Functions and Server-Sent Events to stream Gemini responses and generate structured book chapters.

Dristi AI - Full-Stack Android Assistant

Nov 2025 - Jan 2026

Kotlin, Jetpack Compose, Ktor, Django REST Framework, Gemini

- Built a full-stack AI assistant with a native Android client and Django REST Framework backend.
- Implemented OTP-verified JWT authentication, encrypted token storage, profile onboarding, and protected REST endpoints.
- Integrated Google Places and an astrology API to persist personalized birth-chart data; built a Gemini chat pipeline using server-side user data and multi-turn conversation history.

OOTD - Award-Winning Hackathon App

Sep 2026

Kotlin, Jetpack Compose | TXST Shipathon

- Designed the UI/UX and implemented the entire Android frontend for an AI outfit recommendation app, owning the mobile side of the team project.
- Collaborated with a backend teammate to deliver a prototype that won a hackathon award at TXST Shipathon.

Activities

AI Interview Coach - HackTX 2025

- Designed a Gemini workflow for resume-specific behavioral questions, adaptive data structures and algorithms coaching, and structured candidate feedback.

Open Datathon - Texas State University

2025

- Analyzed five years of enrollment and SAT trends across demographic groups to study patterns around test-optional policy changes.
